BONAFIDE CERTIFICATE

Certified that this project report **CODING PRACTICE WEBSITE** is the bonafide work of Akarsh Mittal and Reddy Reswanth who carried out the project work under my supervision.

Nikita Kaushik
CSE 326 Faculty
25821
School of Computer Science and Engineering

1.Background and objectives of project assigned: -

1.1 BACKGROUND: -

A **photographic album**, or photo album, is a series of **photographic prints** collected by an individual person or family in the form of a book. Some book-form photo albums have compartments which the photos may be slipped into; other albums have heavy paper with an abrasive surface covered with clear plastic sheets, on which surface photos can be put. Older style albums often were simply books of heavy paper on which photos could be glued to or attached to with adhesive corners or pages.

1.2 MOTIVATION: -

Our website acts as a double utility for personal photo collection and album. It provides the company **Canvas Inc.** all the required tools to give it's customers a full fledged digital photo album and also a demo for the hard copy version of the album to be delivered later.

1.3 Goal of the Project Canvas Inc. Photo Album Website:

- To remove the need of hard copy Photo Albums
- Providing simple yet full-fledged photo viewing experience
- Save the time of both admin and customer.
- Get online package for each user.
- To save cost for each other.
- User friendly.

1.4 OUTCOMES: -

It is lightweight and fully responsive, as well as comes with the Bootstrap grid system and loaded with Font Awesome. The site is static and comes production ready if you just want to add your information and go. Alternatively, you can edit styles, colours, and scripts fairly easily. The site was built as modular as possible to make it easy to shift around styles and content.

1.5 CONCRETE GOALS: -

Our goal is to be the top in Photo Album Website. To bring we need to bring more and more Viewers. And our viewers should be satisfied with our website. Now a days people don't want bulky and massy websites but something more on the colourful and minimalistic side. Keeping these in mind we have built one such website giving users delightful experience.

1.6 OBJECTIVES: -

Canvas Inc. was created to simplify image viewing and sharing in these modern times. We strive to become better and better in our journey and proving valuable services to our customers. We try to continue achieving excellence and make better the this simple yet responsive site, designed in HTML and CSS validated with JS. To make it more reactive bootstrap is used to make it more responsive.

1.7 Expected Benefits of the Project Canvas Inc. Gallery Website:

1. Improve Advertisement Effectiveness.

2. Easy Access to the customers.

3. Find Support and Motivation.

4. No need of third party apps

5. Improve customer relationship with immediate response to their message or question asked.

6. Save Money on Printing and Distribution cost for the advertisements of the products.

SCREENSHOTS OF DESIGNED WEB PAGES:

1.   Home Page + SET 1 Photos

2. Set 2 Photos

5. About us

WORK DONE BY EACH STUDENT OF THE WORK:

We basically used html, CSS and JavaScript for the designing of the website we create different html documents to let the user to navigate on different pages according to the option given on website. We use CSS for the styling purpose like hover effect different types of fonts we downloaded and get them linked in the files to be executed. We also use JavaScript to make the website the website more attractive. The implementation of bootstrap is also there for example giving the link of Facebook and twitter on the menu bar is done with the help of bootstrap. we have made all these files on notepad and link them with each other and run them on the opera browser as the files are linked with each other on opening any html file the whole website gets opened.

Work done by each student:

Akarsh: Used HTML, CSS, JAVASCRIPT, BOOTSTRAP framework to build this website.
Home page, SET I, SET II, SET III gallery categories and organising images in thumbnail as well as enlarged view. Made About Us and contact page. Linked all files together.

Reswanth: Provided crucial inputs and collected all the images used in websites. Did great work in website styling. Reviewed Code after the completion of various modules.

6. SWOT Analysis achieved in project: -

1) **Strengths: -**
   - **Well located**
   - **High sign-up numbers**
   - **Experienced emplys**
   - **Good reputation and credibility**
   - **Strong in marketing and Advertisement**
   - **Providing Different Services**
   - **Affordable prices**
   - **Partnerships with well-known companies.**

2) **Weaknesses: -**
   - **Are not big enough to offer different activities**

3) Opportunities: -
- **Broad their services (nutritional advisement, offer different sports)**
- **Focus more on different targets(companies).**
- **Hiring more members of the Marketing Team**

4) Threats: -
- **Strong Competition**
- **Economic crisis (unemployment)**

5. Conclusion of the project: -

Learning with implementation is the best way to become the best in any field and the same goes with learning computer languages too. We started from the basics and now we are able to build a full fledged website. Thanks to the opportunity provided to us by the teacher to build this gallery website our concepts are fully clear. This project has proven to be a worthwhile exercise in software development from inception to planning and execution of the code.
